SKILLS

C language

- Strong understanding of low-level programming and algorithm implementation.

Python High-Level Programming

- Object-Oriented Programming and data validation
- Applying graph algorithms in Python

Systems Programming

- C language
- Manual memory management
- File I/O and buffer state management

Algorithms & Data Structures

- Algorithm optimization and complexity analysis
- Graph traversal algorithms (DFS, BFS, Prim's)

Assets

Teamwork

Ability to work effectively in collaboration with developers, designers, and project stakeholders to achieve shared objectives and deliver successful outcomes.

Adaptability

Ability to quickly adapt to new technologies, tools, and changing requirements in software development projects.

Languages

English
Fluent

French
Good

Passionate software developer driven by technological innovation and the creation of solutions. With strong programming and software development skills, I am constantly seeking stimulating challenges where I can contribute to the success of projects and deliver impactful results.

Education

Software Engineer

Since Oct. 2025 1337 Benguerir
Studying Computer science

High School Diploma

From 2020 to 2023 Lycée Ibn Soulaïman Roudani Taroudant

Technical projects

So Long (2D Game)

From Nov. 2025 to Dec. 2025 1337 Benguerir
Developed a 2D game from scratch without a game engine, Event-driven programming and real time rendering. (C language)

Push Swap (Algorithm optimization)

From Jan. 2026 to Mar. 2026 1337 Benguerir
Developed and optimized algorithms (C language), including comprehensive time and space complexity analysis.

A-Maze-Ing (Maze generator)

From Feb. 2026 to May 2026 1337 Benguerir
Programmed a maze generator in Python, Implementing core graph traversal algorithms, specifically Depth-First Search (DFS) and Breadth-First Search (BFS), to handle generation and pathfinding.

Work Experience

Content Creation

Since Aug. 2025 Youtube & TikTok Benguerir

- Launched and run the "YahCodes" tech brand, producing content across YouTube and TikTok focused on software development, AI, and emerging technologies.
- Produced and edited educational videos to break down tech concepts.
- Built an engaged online community by consistently sharing practical tech insights.

Additional Certificates

Decoding DevOps - From Basics to Advanced Projects with AI

Since Mar. 2026 Udemy Online
Master DevOps with AWS, Docker, Kubernetes, GCP, GitHub Actions, ArgoCD, GitOps, Terraform, Monitoring & AI
